Mission Statement

To develop, produce and market environmentally responsible solutions for the management of urban pests and microbiological organisms affecting public health and hygiene in highly sensitive accounts.

To provide research, education and training to professionals and institutions engaged in the practice of safe, effective and economical integrated pest management in urban environments.

Highly Sensitive Accounts Defined

Highly sensitive Accounts are any facilities where a health concern exists if people (especially children, sick & elderly), animals and their environments are exposed to the chemicals used to manage pests and microbiological organisms. Therefore, effective and economical alternatives to chemicals are the only solutions.

Our Commitment

UPMA LABS is committed to bringing you, from around the globe, the most effective and economical alternatives to chemicals against urban pests and microbiological organisms affecting public health and hygiene in highly sensitive environments.

URBAN PESTS

Insect Pests

Cockroaches
Fleas
Flies
Fire Ants
Lice
Mosquitoes
Wasps

Arachnids

Mites
Ticks
Scorpions
Spiders

Rodents

Mice
Rats

Microbiological Organisms

Bacteria, Fungi
Viruses, Protozoa

HIGHLY SENSITIVE ACCOUNTS

Animal Care facilities

(Animal Research Laboratories, Pet Shops, Zoos...)

Educational Institutions

(Schools, daycare Centers, Convention Halls)

Food Industry

(Restaurants, Fast Food, Food Processing Plants...)

Health Care Facilities

(Hospitals, Nursing Home, Medical Clinics...)

High Tech Operations

(Computers, Biotechnology, Pharmaceutical Plants...)

Hospitality Industry

(Hotels, Motels, Resorts...)

Public Housing

Public Transportation

(Air Planes, Trains, Buses, Cruise Ships...)

Recreational Facilities

(Theme & Water Parks, Camps, Country Clubs...)

Retail

(Shopping Malls, Supermarkets...)

Products From UPMA LABS

Urban Integrated Pest Management:

Urban Integrated Pest Management (UIPM) is an effective and environmentally sensitive approach to long-term management of pest problems by the most economical means, and with minimum impact on human health, property and the environment.

UIPM programs are educationally based (Strong knowledge of the target pest population dynamics is required) and use a combination of pest prevention methods, non-chemical treatments and, if needed, least toxic alternatives to solve pest problems in sensitive environments

Inspection, Monitoring & Pest Identification Tools

- Flashlights
- Inspection Mirrors
- Monitors
- Dissecting Microscopes and Hand Lens
- Identification Charts

Pest Prevention & Mechanical Exclusion Materials

- Caulking Agents
- Crack Sealants

Non-Chemical Tools

- Insect & Rodent Monitors
- Mechanical & Pheromone Traps
- Light Traps
- Physical Treatment Tools

Natural Repellents/Attractants & Delivery Systems

- Pheromones & Pheromone Delivery Systems
- Repellents & Repellent Delivery Systems
- Attractants & Attractant Delivery Systems

Least Toxic Bait Systems & Inorganic Dusts

- Boric Acid Dusts & Delivery Systems
- Boric Acid Based Bait Systems For Cockroaches
- Boric Acid Based Bait Systems For Ants – Gel & Liquid Systems

Antimicrobials & Delivery Systems

- Sterilizers
- Disinfectants
- Sanitizers

Odor & Fly Control Systems

Services from UPMA LABS

Complete Packages include:

- Research & Product Development
- Product Registration
- Sales & Marketing
- Technical Services

Research & Development – Develop your Product

Customized Packages for new Product Development include:

- New Product Need Assessment & Strategy
- New Product Idea Generation and Testing
- Product Formulation
- Laboratory & Field Testing – Protocols and Coordination
- Results Analysis & Evaluation

Product Registration – Comply with the Laws & Regulations

Customized Packages for Product Registration includes:

- Federal – US
- State - US
- International

Sales & Marketing - Bringing your Product to Market

Customized Packages for Sales & Marketing include:

- Focus Groups – Pre & Post Product Development
- Test Market
- Product Launch
- Distribution
- Follow up

Technical Services – Support your Product

Customized Packages for Technical Services include:

- Technical Training – “Urban IPM in Highly Sensitive Environments”
- Technical Articles
- Seminars, Workshops, Symposia
